

Isaptent

Cervical Dilator

- Used for Medical Termination of Pregnancy (MTP) or abortion as well as for performing minor gynecological surgeries
- Indigenous: developed from the husk of the plant, *Plantago ovata* (isapgol)
- Unique property of isapgol: swelling up to seven times when absorbed in water, has been utilized for dilation
- Added advantage: natural lubrication power of the husk
- Extensively used by primary healthcare centers, family planning establishments, hospitals and individual gynecologists for performing MTP
- Inexpensive and easily available
