CSIR Integrated Skill Initiative

Certificate course on Skill Development in "Pathological Tools & Techniques (PTT)" for Biomedical Applications

This program is aimed at training candidates for the job of a "Medical Laboratory Technician" in the "Health care" Sector/ Industry/ Diagnostic Technician and aims at building the following key competencies amongst the learner.

Program Name	Pathological Tools & Techniques for biomedical applications >
Duration	4 weeks (Last date of submission of application is 01-05-2025)
Pre-requisites to	Class XII in Science Or Level 3, B. Pharm+, B.Sc.+, B.V.Sc. & A.H.+, M.B.B.S.+
Training	
Course Fee	10,000/-
Nodal Officer	Dr. Madhav Nilakanth Mugale; Email: madhav.mugale@cdri.res.in
Training	After completing this programme, participants will be able to:
Outcomes	Describe the health care sector and diagnostic services
	• Perform clinical skills essential in providing basic diagnostic services such as Correctlycollect, transport, receive, accept or reject and store blood / urine/ stool and tissue samples, etc.; Conduct analysis of body fluids / samples; Maintain, operate and clean laboratory equipment; Provide technical information about test results; Prepare and document medical tests and clinical results; etc.
	• Explain quality assurance in Laboratory works
	Histopathology slide preparation
	Blood analysis
	• Urine analysis
	Haemato- biochemistry
	• Special staining of histopathology slides
	 Post mortem technique Microbiology ager proparation and plating
	Practice infection control measures
	 Ensure readily availability of medical and diagnostic supplies
	 Demonstrate techniques to maintain the personal hygiene needs
	 Demonstrate actions in the event of medical and facility emergencies
	• Exhibit professional behavior, personal qualities and characteristics of a Medical
	Laboratory Technician
	• Understanding the pathogenesis, data interpretation in research work
	• Demonstrate good communication, communicate accurately and appropriately in the
	role of Medical laboratory Technician

Guidelines for Assessment

- 1. Criteria for assessment for Each Performance Criteria (PC) will be assigned marks proportional to its importance.
- 2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC
- 3. Individual assessment will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below)
- 4. Individual assessment will create unique evaluations for skill practical for every student at each Examination based on training criteria
- 5. To pass the Qualification Pack, every trainee should score as per assessment grid.
- 6. Passing % will be 60% for each (theory and practical).

Pathological Tools & Techniques (PTT) <u>Curriculum</u>

S.N 0	Module	Key Learning Topics
1.	Healthcare Systems, Laboratory & Delivery	 Introduction to Pathology Understanding the basic principles of pathology Functions Understanding various Diagnostic Centers and medical laboratory facilities
2.	Role of the Pathology Technician	 To develop broad understanding of the Role of diagnostic pathology technician To identify Laboratory maintenance needs to be taken care by pathology technician To exhibit Ethical Behavior Welfare and Ethical consideration during running of laboratory or animal experimentation?
	Practical	Various types of record/ SOP in the laboratory/ Hospital
3.	Structure and Function of Human Body/ animal body	 Understanding basic unit of body-Cell Understanding different parts of body
	Practical	 Preparation of various reagent and stain (10% NBF, Leishman stain, Giemsa stain, Hematoxylin & Eosin stain) Principles of NABL and GLP accreditation and visit to lab.
4.	Body Fluids	 Understand blood cells in detail Understand Hemostasis & Coagulation Mechanism and testing in detail
	Practical	 Blood sample collection: Human and rats To gain broad understanding of correct procedure of sample transportation
5.	Introduction to Laboratory related Medical Terminology	 To gain broad understanding of different types of samples to be taken in medical laboratory Understanding about Sample Handling Understanding of correct method of blood sample collection.
	Practical	Hemoglobin and E.S.R. estimation
6.	Personnel Hygiene	Use of PPE
	Practical	Total WBCs and RBCs counting
7.	Bio Medical	 To gain understanding of importance of proper and safe disposal of bio-medical waste & treatment
	Waste Manageme nt	 To gain understanding of categories of bio- medical waste To learn about disposal of bio-medical waste – color coding, types of containers, transportation of waste, etc.
	Practical	 To gain broad understanding of means of bio- medical waste treatment Practical demonstration and classification of biomedical waste
8.	Introduction to Bacteriology, Immunology and Serology	 To gain Broad Understanding about Introduction to Microbiology Understand common methods of sterilization & disinfections Understand cultivation of bacteria Basic Immunology and common immune diseases To gain Broad Understanding about Immunology and Serology
	Practical	Culturing and plating Gram staining

9.	Clinical Pathology: Blood group Practical	 Understand ABO blood group system in detail Understand Rh blood group system in detail Understand other blood group systems in brief Understand methodology to identify blood groups Hematology analysis: By running the QC & test sample Blood group: Interpretation
10.	Introduction to Clinical Pathology Practical	 Blood group: Interpretation Erythroid series cell formation, Function and their normal cell count & their variation? Reticulocyte count? Different stain preparation Introduction to analyzer: Clinical pathology Serum and plasma separation
11.	Post mortem Observing & Reporting	 Liver function test and Kidney function test Dummy necropsy and sample collection for histopathology
	Practical	 Postmortem examination Post mortem report preparation
12.	Introduction to Histopathology	 Preservation and fixation Histopathology process and its principles
	Practical	Histopathology techniques
13.	Infection control and prevention	Preparation of block & rough trimming
	Practical	 Preparation of Histopathological slide (S) H and E staining
14.	Special Staining	 Safe and comfortable sample collection Describe importance and methodology of cleanliness, and hygiene environment in collection space
	Practical	Special staining: Masson trichrome for collagen, staining for fat, PAS
15.	Introduction to Cytopathology	 Explain basics of cytology / cytopathology Basics of staining and its requirement during diagnosis
	Practical	Blood smear preparationStaining of blood smear
16.	Practical	Use and demonstration of diagnostic kitsBiopsy or cytology staining
17.	Fine needle aspiration	Understand the purpose of fine needle aspiration
	Practical	 Understand about HP section cutting and staining Hand on practice
18.	Introduction to Parasitology, Mycology and Virology	 Describe the in brief various pathogenic organism Bacteria, Virus, parasite and fungi
	Practical	Identification of various blood cells?Clinical importance of blood cells?
19.	Stool examination	 Importance of stool examination Describe source of error/interference /quality of work and initiate corrective action as applicable Describe assessment of results to initiate follow-up testing Differentiation between clinically significant and insignificant findings
	Practical	 Preparation of stool sample Identification of pathological cause
20.	Introduction to Advanced techniques and future trends in laboratory	 Updated on advanced techniques and future trends in field of diagnostic microbiology Updated on advanced techniques and future trends infield of molecular diagnostic technique

	Practical	 Molecular diagnostic techniques practical Immunohistochemistry
21.	Introduction to Advanced techniques and future trends in laboratory science-II	Principles of PCR
	Practical	• RT-PCR
22.	Urology	Importance of urine examinationPreservation of Urine
	Practical	 Analysis of urine, & report preparation Macroscopic and microscopic
23.	Soft Skills and Communications	 Able to handle effective Communication with Peers/colleagues using medicalterminology in communication Learn problem solving
	Practical	Opportunity of pathological skill
