

SBC (I) 95th Annual Meeting

(First announcement)

Advancing Biochemistry and Translational Research
to Address Evolving Healthcare Challenges

October 28-30, 2026

CSIR - Central Drug Research Institute, Lucknow

About SBC (I)

The Society of Biological Chemists (India) (SBC(I)) is one of India's oldest and most prominent scientific organizations dedicated to advancing the field of biological chemistry. Founded in 1930 and headquartered at the Indian Institute of Science (IISc), Bangalore, the society has grown to over 3,700 life members. SBC(I) aims to coordinate research efforts among biological chemists across India, organize scientific meetings, symposia, and workshops, recognize outstanding contributions through awards and fellowships, and support young researchers and promote interdisciplinary collaboration.

About CSIR-CDRI

The CSIR–Central Drug Research Institute (CSIR-CDRI) is a leading biomedical research center known for its excellence in both basic and applied research. It operates across a wide range of therapeutic areas, including infectious diseases, cancer, metabolic disorders, musculoskeletal conditions, neurological disorders, and reproductive health. The institute focuses on preclinical research and the development of drugs and diagnostics in areas of national importance, to support affordable healthcare. As it celebrates 75 years of scientific achievement, CSIR-CDRI has made notable contributions, including the development of 13 drugs and the licensing of more than 80 process technologies to industry.

Theme Areas

- Structural Biology & Drug Discovery
- Clinical Biochemistry
- AI-ML In Biochemistry and Drug Discovery
- Biotherapeutics
- Cell and Developmental Biology
- Immunobiology
- Metabolism and Lifestyle Diseases
- RNA biology in the origin and evolution of life
- Bone and Reproductive Biology
- Biochemistry of Rare Diseases
